SIR JOHN SIMON ON "IF THERE'S A FIRE."

S/V Sir John Simon. Each year about 800 persons are burned to death in this country, and thousands, suffer injury, as the result of household fires.

SYNCH

S/CU. It is estimated that the material loss caused by fire amounts to as much as £20,000,000 a year, yet much of this human suffering and loss could be avoided if the public were made aware of certain simple precautions and methods.

↑

NEG

S/V. I have in my hand a pamphlet entitled "Fire Protection," hints to householders which has just been issued by the Home Office, and which contains valuable advice with which everyone should be familiar.

↓

NEG

CU. ~~But what one reads makes less impression than what one sees,~~ and so this film has been prepared in order to illustrate some of the more important hints in the Home Office pamphlet.

NEG

S/V. May I ask you to bear in mind what you have seen, and to teach your children and train your household so that they may be able to take the right action if unfortunately a fire should occur in your own home. The pamphlet only costs ~~three~~ threepence, it can be got from any bookseller. ~~Have a little fire drill in your own home from time to time, and if you do I am quite sure you will be playing the part of a good citizen helping to reduce this danger in our own country, and reducing the risk of loss and damage to your own friends and neighbours~~
