

Instructions for making a Flea-Bag.

Take an Army or similar thick blanket, about 7 feet long and $6\frac{1}{2}$ feet wide. Line with muslin or cotton material to within a short distance of the top. Sew straight across both blanket and lining horizontally at intervals of about a foot, thus making pockets, which should be stuffed with wollen rags, rough wadding, or any warm material available. Fold the two sides of the blanket towards the centre and sew together to within about 2 feet of the top. Sew together at the bottom. Sew tapes on the open sides of the bag at the top so that they can be tied together when the person is inside.
