BRITAIN INTENSIFIED BLITZ ON AXIS SHIPS.

Issue No. 1101..17..9..1941
Title: Glacier.
Track: Do.
Lines: Bidwell.
Voice: Mellor.

Intercepted by the Navy, the crew of this German supply ship scuttled their vessel, and for a rare moment the cine-camera lifts the veil on the thrilling drive which is sweeping the few remaining Axis ships off the seas.

(SV BURNING SHIPS) Damaged beyond salvage, a danger to navigation, a torpedo finished her off.

(TV CREW WATCH) To date the Axis has lost over four million tons of shipping - a million tons in the last three months.

(WAKE) Resuming her search the destroyer soon found another. Once again the Germans scuttled their ship. If you look closely you'll see some of the crew still running about onboard.

(CU CREW ONBOARD) With the crew rescued the destroyer, once again sent a torpedo on its mission.

(GV TORPEDO HITS: AFTER EXPLOSION) Then to speed her sinking, the destroyer closed in and launched depth-charges.

The drive against Axis ships is at its height. Between the RAF and the Navy, they're on the spot whenever they leave port.
