

EX AUSTRALIAN SHIPMENT.

PATHE DOPESHEET.

"QUEEN MARY" IS PALATIAL TROOP SHIP.

"Queen Mary"- 81,000 tons of magnificent ship and the third largest afloat. Six times she has been in Australian waters during the war, and only now may the story be told.

Her maiden voyage arrival is very hush-hush but the small craft are soon hard on her heels and sight-seers line the foreshores. And what a sight they see. A five million pound triumph of British shipbuilding. And she's here on no pleasure cruise.

"Queen Mary" is a troop transport and will take away the first contingent of the A.I.F. to go abroad.

"Queen Mary" has taken men of the eighth division to Singapore and later brought American troops to Australia. Many times the rumour-mongers sank her. But she always turned up to prove them wrong. She has carried as many as 14,000 troops in one shipload!

On her way - a proudship, with a gallant company!
