

## FARM SUNDAY

All over the country land-girls and all other farm workers took part in the new land festival, Farm Sunday. It took place on Rogation Sunday, when the Churches have always prayed that the summer should be blessed by <sup>a</sup> bountiful harvest. In that prayer nowadays the whole nation joins. Picturesque processions were a feature of the ~~celebrations~~ <sup>day</sup>. The women's land army has played a big part in the record food production ~~to meet~~ <sup>to meet</sup> the needs of war.

(After Hitler) So great has ~~the~~ been the response of dairy farmers that the milk ration has been increased and still greater supplies are confidently expected.

Even milking by internal combustion engine is cheerfully put up with by the cows in the general interest.

One of the attractions was a prize bull weighing well over a ton and ready to take on the whole German army....

Another was the potato grading machine. The hard work and good will of the British Farming community looks like providing at the end of this summer a real victory harvest.
