

ATS LAND IN FRANCE

The first contingent of ATS girls landed in Normandy to take up clerical duties and so release men for something more active. They're the first of many to come. The war has swept far south of the beaches, which have now resumed their peaceful quiet. Not far from the landing place the maidens in uniform arrived at the camp which will be their first home in France. When they'd moved in they wrote home to tell mother, or anyone else who'd be interested.

There's a great deal of office work about modern war. *A.T.S. wants a urgently report!*
~~Now that we're established in a large area of Normandy~~
~~it's quite safe for whole battalions of ATS~~ ^{may} ~~to go over.~~
Good luck to them.
