

CANADA EXPOSES ATOM SPY RING.

Uncovered at Ottawa by Canadian Prime Minister Mackenzie King is ~~now~~ ^{an} international sensation - the discovery and arrest of ~~many~~ spies, attempting to probe secrets of the Arctic defences of the North American continent. Inside the Arctic circle, before selected foreign observers - ~~none from Russia~~ - Canada carried out operation Musk Ox, code name of scientific research ^{into} concerning the best means of warding off foreign attack by the Northern route. Overcoming well-nigh ~~impossible~~ ^{impossible} conditions the scientists were well advanced in their investigations when the spy ring was discovered. No secret is made of the fact that Russia was anxious to discover what was going on and ~~now~~ suspected that Musk Ox had something to do with Atom bomb rockets, as well as defence. Commenting on ~~the~~ news Joseph Davies, late American Ambassador in Moscow, declares ~~Russian~~ spying justified while Atom bomb secrets are kept from ~~the Soviet~~ ^{Russia}. [Meanwhile the scientists encamped in Arctic wastes are in the news spotlight of the whole world, a world vitally concerned that the atomic discoveries shall not be used as counters in international affairs.]
