

NOAH'S ARK FLIES OCEAN

By air from Siam to California rare animals for American Zoos, valued at £30,000, made a voyage unique in animal history. Young America was there to say, Welcome. One of the fifteen hundred passengers was a Gibbon Monkey, a favourite from the start. Malaya sent two baby elephants, aged six months and weighing a mere fifty stone each.

(kids) A real live teddy bear, native of the Himalayas, took one look at California and knew he was going to ~~lick them~~ like the people - lick them in fact.

(Kid)

The baby of the shipment ^{was} the Nanghill Monkey. The little chap had every excuse for feeling bewildered, but he's destined to have a lot of fuss made of him.

1. TITLE: NOAH'S ARK...UP-TO-DATE

2. A Noah's Ark with wings - completes one of the longest ocean flights in history. This specially chartered plane flew from Siam to Ontario, California, carrying \$100,000 worth of rare animals for American zoos.

8. The Gibbon - late of the Malay Peninsula is one of more than 1500 zoological passengers!

11. From Siam - six months old - and eight hundred pounds, each!

14. Ooh, a baby leopard. And a fine feathered wotzit - the "Goofy" bird.

17. This Himalaya Bear, third cousin of the Teddy Bear, likes it here.

Such nice people, these Americans!

20. But the smallest passenger, the Manghil monkey, isn't so sure about all this international friendship, this hands-across-the-sea stuff!

23. "Hey, Bud - where does an alien go to register around here?"
