

WOT, NO BABIES !

There'll be no more of these for the next ten years,  
if birth control pioneer, Mrs. Margaret Sanger ~~Slee~~ <sup>of America</sup> has  
her way. To women, urged on all sides to do more in  
the last few years, and now urged to go on doing it,  
it's the first suggestion on record. that they should limit *their*  
effort - and in just the thing men can't do for them.

Australia will have no truck with this no-baby idea.  
Many young couples passing Australia House learn <sup>the</sup> welcome  
news that the Commonwealth will be glad to have them, plus  
all the babies they care to bring up when they get there.

Immigration Minister Caldwell ~~urges~~ <sup>to emigrate</sup> the Commonwealth's need  
of men and women from Britain. *is urged by* ✓

So, take heart girls, The world ~~is~~ still wants your babies,  
not only at home but in the Dominions and Colonies, <sup>mighty</sup> lands  
of plenty, crying out for British men and women, to make  
them mightier yet. No babies for ten years! Whatever next!
