

## ROBOT PLANE FLIES OCEAN

The ~~American~~ Skymaster Robert. E. Lee automatically flew  
On the drome was Air Minister Noel Baker.  
the Atlantic. ~~skymaster robert e lee automatically flew~~

To the plane the U.S. airforce fitted new radar devices  
which did all the flying and navigating. Pilots never  
touched the controls after the take-off. ~~The mass instruments~~  
~~were expertly examined by RAF visitors. The Atlantic~~  
~~flight was severely practical.~~

~~were~~ expertly examined by RAF visitors. *were it mass o instruments* At the touch of  
a switch the automatic navigation and control takes over,  
~~and the plane keeps on the pre-set course. ~~Even if~~ the~~  
~~landing ground~~

and the plane keeps on the pre-set course. Even if ten-tenths  
fog shrouds the landing-ground the airliner is safely  
brought on to the runway.

How the miracle ~~is achieved~~ *works* is secret. The layman must be  
content to murmur Radar, Beam, Gyrospin, and suchlike, and  
understand vaguely. The point is it makes air travel  
safer still.
