Our picture shows a section of "Operation Longstop" headed by 2/Lieut. John Bamber and Privates R.J. Swanepoel and N. Powell together with Masai, Elgeo, and Kikuyu tribesmen in the Aberdare Forest. Shots also taken of the 20 or so Mau Mau terrorists at "I" Force H.Q. from which the operation is directed. Also the loading of foodstuff at Op.H.Q. and it's final drop to the troops on operations.

The Camera used is a De Vry which I think the shutter may not have been synchronizing during the first 200 feet of the film.
