## NEW LIFEBOUY-SUIT TESTS

=====

A new lifebuoy-suit made of plastic material was tested at the Stadio water-pool in Rome.

The suit is worn by the ace paratrooper Totò Cannarozzi who jumped from a 10 m. high springboard into the pool remaining in a normal position.

Spots show Mr. Cannarozzi wearing the suit which fills with air by ~~it~~ itself and is tightened around the neck; a sort of belt around the waist is inflated by the air and keeps the man afloat. Special conic pockets under the feet permit to walk as the water filling them makes the necessary resistance.

This suit has been specially studied for soldiers who have to walk into the water keeping their guns at arm-length over their heads. It also keeps the body warm.
