"LIKE AN A-BOMB" DRAMATIC FILMS VOLCANOES ERUPT IN ALASKA

Sleeping giants go on a rampage! From 30,000 feet up come dramatic airviews. This is Mount Katmai, a volcano, northwest of Kodiak, Alaska. Center of a vast national park, Katmai is in sudden and spectacular eruption for the first time in 41 years.

When the volcano last blew its top in 1912, it forced the evacuation of settlements a hundred miles away.

Scenic and silent until now, it spews forth a remarkable effect. You've seen mushrooms like this before, only as a result of man-made atomic explosions. Now, 6 miles over Alaska, a vast atomic-like cloud, — nature's own!
