Shots of Mount Kenya showing snowcap and slopes on which it is known that over 500 Mau Mau terrorists are holding out and on which several "I" Force patrols are pursuing them.

Small Section of "I" Force (see cutting) consisting of men of the Kenya Regt. and several Turkana trackers armed with spears proceed on patrol in the Aberdare mountains. They discover a terrorist hideout and surround it. Entry is made into the huts and Mau Mau found inside are arrested, disarmed, and led way to clearing in forest where they are interrogated. As patrols in the Aberdares are inaccessible by any other means, food etc. supplies are dropped by air. Scene of an airdrop is shown.

Aerial view of Mount Kenya taken the following day - by plane sent to recon slopes of Mt. Kenya and to discover whether there were any caves visible which Mau Mau might be using. Did discover caves (hope these are clearly visible) Also shows European farms in relation to the mountain and the forest belt.

"I" Force, during operations on Mount Kenya systematically bring down all huts on fringe of forest to prevent their use as shelter for Mau Mau. One of these burning huts is shown.
