

### FRENCH HELICOPTER

In the presence of civil and military air attaches, the National Society for the Construction of Aircraft of the Sud-Ouest (S.N.C.A.) demonstrates on land and in the air their jet helicopter, the "DJINN", which lifts two passengers, pilot and 240 kgs in weight. It rises to 1000 ft. in 52 secs and flies level at 4200 metres (world record)

The DJINN is of all-French construction and a revolutionary type of helicopter.

### HELIPORT

Helicopter station inaugurated on the terrace of a 7 storey apartment in middle of Paris, which makes it one of the most modern in Europe. It comprises a garage, service station of the latest type, a modern stage for the use of motorists, who can have their car washed in record time thanks to a tunnel which permits of automatic washing of the car.
