

FAT-STOCK COME TO TOWN

1250 very high class animals were at

Earls' Court for the Smithfield Show. From the Highlands

came canny cattle to tell a shaggy-bull story. Entered by *t*

Duke Cornwall
~~Prince Charles~~

was second prize winner, ^a Devon steer, Climsland ^t
Toby.

14 little pigs at a time can be fed by the electric pig

rearer, without any help from mother. Pigs have a big

place in the Fatstock Show; so clean they hardly know them-

selves. Sheep had a wash and brush up too, in the hope of

catching the judges eye. ^{*} Complete with everything but a

smog mask were some Southdowns. They'd ~~been~~ so beautifully

clipped it would ~~have been~~ ^{be} tragic to let them get dirty.

The Nuffield Multi-Purpose Diesel Tractor goes for an hour

on three-quarters-of-a-gallon, an economy not expected of

the Hogmuddle Rotary Niggler and Fidgeter, designed by

- Punch Artist Rowland Emmett. In its own original way

~~featherbed~~ the Niggler does everything a/farmer can do except grumble.

~~Where everything's so wonderful it's difficult to award~~

~~the Palm. Perhaps it goes to the part that fills ~~the~~~~

~~up the Government forms.~~

Cattle were judged by an American, the Dean of Kansas

~~State~~ Professor Weber.

State College, ~~and~~

Champion of the Show.

was an Aberdeen Angus Steer, Winston. A few days under

two-years-old he weighs 12-cwt. 25-lbs., a worthy

winner.
