

MODERN GULLIVER BESTRIDES BARCELONA

Why's he stopping there? What's he afraid of? Atom bombs?

No, ~~it's~~ the giant!... Well, it isn't Gulliver up to date.

Just a Spaniard who's a genius at making model cars.

He's put together 150 different ~~models~~, ~~makes~~ —  
some with 1500 parts, often as small as in a watch.

54 [ Little wonder our cameraman didn't know whether it was  
1955 or back in the times of Gulliver's Travels.

83 The safest thing <sup>is to</sup> ~~want to~~ get in the car and beat it,  
before he's changed into a Lilliputian.
