

OIL PATCH KILLS SEA BIRDS IN THOUSANDS

Covered with oil seabirds are in distress along the North German and Danish Coasts. Thousands have been drowned, unable to fly or swim. The oil came from ~~the~~ a Danish Tanker which ran aground at the mouth of the Elbe and pumped out 6,000-tons ~~of it~~ in the hope that she could be refloated. At one time the oil patch covered 10,000-square-miles. A vet on the Island of Sylt uses washing day methods ~~in~~ with seabirds brought to him. Soap gets in your eyes....
