

TROOPS TRY WAR AT 68 BELOW

Knowing ^H the Arctic may be the battleground of the future
the American Army held manoeuvres in Alaska, near the
Arctic Circle. Anything that won't work up there will
be dropped from the northern equipment list. To reinforce and
supply the troops ~~and~~ an airlift was the only way. Along
with men the C. 124s landed 400 tons of material.

20

7 of Nose) ⁵⁰ Already the tanks were in action.

Under ^m canvas, ~~shelter~~ ~~at~~ ~~looks~~, men can survive the worst
blizzard, if they "go to ground" quickly enough. Essential
knowledge if war is ^{ever} fought in Polar ~~regions~~ ^{regions}.

COLD WAR...ARMY TEST ON FRIGID ARCTIC

In Alaska, with temperatures dipping to 68 below zero, U.S. defense forces seek the answer to the question: "How shall we fight in the Arctic. Near Fort Grealey, two hundred miles northwest of the Canadian border, ten thousand troops, and their equipment battle the ravages of winter in exercise Mooshorn.

C-124's, with men and material support, the ground forces.

These films show the parachute reinforcements, followed by an airdrop of 400 tons of supplies and weapons.

The provisioning by air is for the troops who have accomplished their end of the maneuvers: the seizing of simulated enemy objectives. Then, part two of Mooshorn: tactical operations.

Here, independent of roads and established communications facilities, preparedness, near the frigid top of the world.
