## DOPE SHEET

Subject: Floods in Austria  
Date: March 4th 1956 Location: Danube, Linz, Steyr. - Austria  
Cameraman: Rieder Type: Levander  
Shipped: By air More to come: yes

Scen by Scen:

As an aftermath following the fierce winter in Austria floods occurred on almost all rivers in this country, worst of all naturally the communities along the river Danube.

The roughcut shows : The development of the floods, banks and woods being flooded, "Schönbühel" at the Danube, Farmhouses and farmers in distress, ~~XXXXXXXX~~ A Autobahn-bridge damaged- The city Steyr at the Enns River is flooded, At Linz the Danube reaches dangerous heights, Urfahr is being evacuated.

The worst stricken cities along the Danube are however Vilshofen and Passau in Germany not in our territory. Vienna is awaiting floods but as the water is already receding the catastrophe of 1954 will not be repeated.
