**EXPERIMENTS AT COLOMB-BECHAR WITH TELE-GUIDED MISSILES.**

In the region of Colomb-Bechar, France is at present carrying out a series of experiments with various Guided Missiles most of which are still on the secret list. As the designers of these Missiles found no testing ground in France that was large enough for the purpose they have now been given proving grounds on the border of the Sahara. In other words-they now have a boundless testing ground all to themselves. The film which you will see indicates what has been done in France in the field of production of Guided Missiles . This film now lifts a corner of the veil in which the Guided Missile experiments have been shrouded up to now.

SUJET : **ESSAIS FUSÉES COLOMB BECHAR**  
Non-exclusive  
Métrage : 68 mètres

DESTINATION : **LONDRES**

FUSÉES TÉLÉGUIDÉES A COLOMB-BECHAR

Dans la région de Colomb-Béchar, la France procède à des essais d'engins spéciaux pour la plupart encore secrets. Les constructeurs qui ne pouvaient réaliser leurs dessins sur les terrains d'exercices trop exigus de la Métropole ont désormais à leur disposition aux confins du Sahara, un champ d'expérience pratiquement illimité. Les images que nous vous présentons montrent l'effort réalisé par notre pays dans ce domaine. Elles soulèvent un coin du voile qui recouvre les expériences en cours.

In the region of Colomb Bechar (border of Morocco & the Sahara) are carrying out a series of tests with guided missiles tests. Most of them still on the secret list. The designers now have a proving ground in the Sahara of unlimited space.
