

RUSSIAN NATURALISTST

A class for young naturalists is flourishing in Riga, where officials of the City Zoo teach them how to care for all kinds of animals. The idea is to get them on a friendship footing. * Not for me, thought a young pup, who didn't want a friend, obviously not a vegetarian.

As mother isn't nursing the cubs, feeding-time's a problem; ~~solids out of the question and even with the bottle the baby can't get the hang of it.~~

An older member of the family was very glad to see his sixteen-year-old friend bringing his dinner. Ingrida looked after him when he was a cub and he won't take food from anyone else.

Down south in Gorgia one of their very rare spring snow-storms drove deer from the mountains. Children spotted them and volunteered to bring them to the village, where they could be fed and sheltered. Anybody wants to know how to catch a deer - this is it, in one easy lesson.
