

An aircraft carrier with the American sixth fleet took  
in supplies in really heavy weather - a difficult  
exercise perfectly carried out. Refrigerator ships  
can keep U.S. men<sup>o</sup>-o-war at sea for much longer periods  
than possible under the old system of putting back to  
port when ~~supplies~~ <sup>supplies</sup> ran low. <sup>Use the</sup> In next door to impossible  
conditions the carrier was stocked up.
