

## DUKE OPENS WIND TUNNEL

The Duke of Edinburgh went to Bedford to give a royal start to a wind tunnel in step with high speed aircraft demands. 14 aircraft companies ~~amammamamamamamamamam~~ have contributed one-  
2 0 ~~m~~ and-a-half-million-pounds to build it. Models will be subjected to wind pressure simulating speeds as high as 990 m.p.h. In the long run the cost will be saved by shortening trial-times for new aircraft.
