

POLIO VACCINE SAFE AND READY

93

Mass production to save life is the order of the day at this laboratory, going full speed ahead on the British Polio Vaccine. Scientific testing proves it to be as safe as anything in the world can be. More than a million-and-a-half children are registered for this vaccination and will be treated as soon as possible.

30

It is hoped that by ~~the~~^{7 means} polio will be vanquished as effectively as was smallpox. The Minister of Health, Mr. Robin Turton, is optimistic that this result will be achieved.

Clinics up and down the country are already giving the vaccine to the first children on the list. This summer thousands of mothers will be free from anxiety that the warm weather may bring the disease into their homes.
