The fight against Traffic Unlawfulness.

Length 68 metres.

Also on the roads in Holland, traffic is causing losses of life each day. Too many road-users do not care about the traffic-rules. In many cases it is impossible for the policemen to lay seize these traffic-sinners.

- ✓ The Police Corps at Wassenaar (near the Hague) now possesses an apparatus, by which traffic-breakers are photographed at the moment that they make their mistake.
- ✓ The two camera's, one for a general view, and the other for the details, come into operation by a push on the button, by which also a light flashes.
- ✓ We'll now show you the practice.

The auto-car patrols the roads during which the policemen keep a sharp look-out for traffic-faults.

- ✓ A fast breach, as e.g. this third car overtaking two others, is recorded on 2 photos, by one push on the button.
 - ✓ The cold photos guarantee a complete objective observation. The point of time of the breach can be read off correct to a second, but also, and that's the point, the number of the autocar which made the breach.
- Though turning to the left is forbidden here clearly, this autocar-driver doesn't care a straw. But at the police-office he can see his mistake with his own eyes.
- It's of no use to deny, because the number of the autocar is clearly visible on the photo.

- ✓ Also at night the police of Wassenaar patrols the roads and also under these circumstances the apparatus works faultless.

Aware of the fact that the cameras record each mistake exactly, the road-user is driving more carefully.
