Inauguration of a big Radio-Telescope

not exclusive

Near the little town of Muenstereifel (Eifel), one of the biggest radio-telescopes of the world was inaugurated.

This radio-telescope is 35 metres high, its radius is 25 m, the construction lasted about 14 months and the costs therefor amount to about 5 millions D-Mark.

This radio-telescope allows the German astronomers to enlarge their astronomical observations and knowledge.
