

CYCLISTS.

The new Minister of Transport, Dr Burgin, has been making an aerial tour of the roads leading out of London, with a view to reducing the appalling total of loss of life. ~~Our cameraman making a similar journey has illustrated a problem which has become increasingly urgent.~~

Certain roads have been supplied with a separate cycle track, following the custom of the Continent, but this track is hardly ever used.

~~Cyclists still prefer the main road in spite of its tremendous load of motor traffic.~~

Four cyclists are killed on the roads every day. 654 met a ~~horrible~~ horrible death in the six months ending last June.

75% of the accidents on the Great West Road alone, ~~are~~ ~~XXXXXXXXXX~~ ~~XXXXXXXXXX~~ involve cyclists. For the sake of their own safety, those who cycle to work or for pleasure, should make use of these separate tracks.

KING CAROL.

London --- King Carol of Rumania caught by our cameraman ~~in~~ during a brief visit to England. After posing at the hotel, our royal guest made a shopping expedition in the West End.

MASSACHUSETTS.... VARSITIES' TRACK MEETING.

Massachussetts --- an athletic meeting between Oxford and Cambridge on the one side, and Harvard and Yale on the other. The combined team of Light and Dark Blues was too much for the American Universities, who were beaten by seven events to five --- the first time British Universities have been successful on American soil.

SWAN UPPING.

The Thames --- the Swan Uppers were entertained at Magna Carta Island by Sir Patrick Hannon, M.P., and the King's Swan Master made a speech.
