

R.A.F. FIRE FIGHTERS.

The Royal Air Force gave a demonstration of the latest fire-fighting methods at Cranwell. A lot of hard words have been used about chemical warfare, but it's the only way to fight the flames when a plane starts ~~burning~~ burning. The demonstration ~~included~~ included a fire-walk by men clad in a sbestos. ~~suit~~ Although it looks dangerous, in a suit like this it's quite safe --- but you mustn't forget to close the back door.

MOTOR CYCLIST DIVER.

Another man who flirted with death, ~~was~~ was a stunt motor cyclist at Topsfield, Massachussetts. ~~Before he started he put plaster on his face~~ Before he started he put plaster on his face.

He put plaster on his face before he started --- so as to be already if he hurt himself. And now he prepares for his death-defying leap --- sixty feet down into eight feet of water.
