

CABINET MEETING.

408

Lord Halifax attended the Cabinet Meeting at Downing Street for the discussion of his report following his meeting with Herr Hitler. Mr Anthony Eden, ~~and~~ Mr Hore Belisha, ^{Sturgeson} were also to be recognised among the statesmen calling at No. 10, as were Mr Duff Cooper and Sir Samuel Hoare. As the other Ministers arrive we recall the invitation by the British Government to M. Chautemps, the French Prime Minister, to visit London and help clear up the European situation. Meanwhile, ~~it~~ must to be on the safe side, armament and air-raid precautions continue. They now have a machine which is equally good at decontaminating the streets after a gas attack, or putting out fires. As soon as he finishes putting out the fire in the little hole in the garden, ^{the fire man} ~~he~~ is going to put out the fire in the house. He was only waiting for it to burn up so that he could see what he was doing.
