KANGAROO.HUNT.

Out in the open spaces of New South Wales they're trying a new kind of hunting. Mr Tom Board catches kangaroos with the aid of a strong right arm and a car. Slow motion shows you the wonderful grace and strength of the kangaroo --- but her mother told her not to accept a ride from a strange man.

Slow motion on the springboard reveals more graceful leaping. At Palm Springs California they're having real bathing weather, while we in Britain are swallowing fog. Mickey Riley and Bill Lewin do a double dive dive act which they call the Coronation Special. Modern diving is made up of one and a half things like the jack knife, and two and a half the back pike, but you can't beat the old-fashioned, straightforward dive.
