

SANDHURST.

415-

This year's end of term inspection at the Royal Military College was made by General Viscount Gort, the new Chief of the Imperial General Staff. The Colour was handed over with a ~~an~~ smartness that would have done credit to the Guards at the Trooping Ceremony on the Horse Guards Parade. The sword of honour was presented to Senior Under Officer Glancy with congratulations, after which followed ~~the~~ march past, and the Colour was escorted in to the tune of Auld Lang Syne.

MODEL YACHTS.

If model yacht-clubs are anything to go by there's a Tom Sopwith born every minute. The latest gadget is a wind vane which automatically moves the rudder to compensate for the action of the wind. But if you have a real sea outside the front door you can go in for yachting on a grander scale. New Guinea produces some of the finest natural mariners in the world. In the old days they would sail right round a big ship and send aboard a shower of arrows. Nowadays, of course, we're ~~xxxx~~ much more civilised --- We use machine guns.
