STREAMLINE TRAINS.

A train of the future runs to-day across Australia. It is called the Spirit of Progress --- all-steel, streamlined for safety and speed -- air-conditioned for comfort. The Spirit of Progress had a top speed of eighty miles an hour --- so compare her with our own newest Streamline. The Coronation Scot between Euston and Glasgow ~~shows~~ ~~that the Motherland can still give a lead to the young blood of the Dominion~~ --- top speed 114 miles an hour.
