

HONGKONG.

Hongkong --- a remarkable aerial view of the British colony in South China. And Britain's defence forces there are prepared for any contingency. Indian troops manoeuvre in the hills --- and manoeuvres become realistic when camouflage netting catches fire. Rajputs dig in while Punjabi artillery roars its drill.

CAR CLEANING.

London --- a new equipment for attending to the toilet of your car while you wait. In eight minutes it will wash, grease, and polish up the most mud-bespattered crock that ever afflicted the eye. They can even put non-skid treatment into old tyres, and ~~the only thing they can't clean~~ the only thing they can't clean is a license.

GOLDEN GLOVES.

America --- 1938 contest for the Golden Gloves. Uncle Sam's enthusiastic nephews seeking the highest honours in amateur boxing. They don't get paid for doing it --- they just love it! Come to Mother!

RAIL WELDING.

Earl's Court --- a new method of welding lines is the latest effort of London Transport in the anti-noise campaign. With this and other improvements, it is claimed that noise on the Underground will be reduced by 60 per cent. So you won't just have to guess what the fat man says when you step on his foot.
