SURFING.

In Manly, New South Wales, they're trying out ~~xxxxxxkind~~ an Australian improvement on the Hawaiian surf-boat --- a kind of surf-ski, safe as a canoe id you know how to ~~xxxxxx~~ handle it.

For it's a handy craft --- you can stand up or sit in it or just fall out --- only these boys are too good for that. Thrills of a lifetime --- thrills of a summertime. These water-babies never seem to tire and when one wave is done they turn back to look for more. / If you get too close there's danger of a collision --- but not with experts. They go into partnership. ~~The Composite plane has nothing on this.~~ /

~~Another Composite Combination /~~

This Composite business is spreading. /
