A.R.P. IN LONDON AND PRAGUE.

Air Raid Precautions continue to play a large part in the news to-day, and on the roofs of shops in London's West End demonstrations are being given, ~~and exhibitions held.~~ ~~The City~~ Westminster has a resident population of 120,000, and every day another half-million come in to work or play. One of the newest devices for protection is a portable shelter, suitable for big business men and the secretary, whether working or playing.

Prague in Czechoslovakia, is also busy with air raid drill, and a realistic rehearsal shows the clearing of a busy street on warning of approaching planes. ~~Traffic stops~~ ~~men and women~~ ~~and children run to earth~~ while gas bombs do their deadly work. But the danger is minimized if troops and volunteers are well-coached in the fight against the menace from the air.
