

TORNADO.

Illinois --- in the springtime in America there is a harveste---
and the grim reaper is Tornado. This was a township called
South Pekin --- but in the middle west it looks as if the war
had paid a call from the Far East. Everywhere wreckage testifies
to the homicidal force of the twisting ~~hurricane~~ ~~whirlwind~~ killer ---
death, destruction and heartbreak come with the wind.

BOB GREGORY.

New York --- Bob Gregory makes his debut in the American
all-in ring, ~~and he puts on a show that proves he's just a~~
~~big boy full of fun.~~ Princess Baba is his bride, watching from
the ringside. Being married to a man who can do this, surely
life at home has never a dull moment. [Bob finishes up the winner
by tying his opponent in a knot. Perhaps he used to be a boy
scout.]

UNDERWATER GIRLS.

Florida --- At Silver Springs, co-eds put on diving helmets
to study what goes on under the water. It's the University
of Miami preparing for the next exam. To the average man these
girls look just like bathing beauties, but to a professor of
marine zoology they are ichthyologists. If that's all ~~they~~
~~are~~ you can't help feeling the professor is missing something.
~~The water~~ ^{It's} is so clear, you can see exactly what goes on under h
the water. Maybe that's why the professor has to be so careful.
