AUSTRALIAN LAND GIRLS.

----- *hundreds of women are working on the land,*
Out in Australia ~~they believe in teaching women to do men's jobs,~~
& Dame Sid Lewis, after inspection, found that they were doing it with the utmost skill,
and very well they do ~~it~~ *it* - some of them. Here at

Victoria, Melbourne, they show their ^{praises} ~~skill~~ as tractor-drivers.

It is so important that the needs of agriculture should never be neglected and that the good earth should give of her ~~innumerable~~ increase. All the work these women put in during the spring, will help to yield a bumper harvest later on.

CHILDRENS THRIFT CLUB.

What a good idea. These children of Croyden Park School, Australia, have to collect waste rags instead of throwing them away. It seems such a pity to chuck out as rubbish, so much that can be turned to good account. For the useless bit of stuff today may become the useful product of tomorrow, - you never know. So that's what these kids are doing - and next time the rag and bone man calls, they'll pile his cart high with all the flotsam and jetsam of the rag basket - it all helps.
