

SHEEP DIPPING.

Sheep, like other human beings, have to ~~xxxxx~~ bathe from time to time. Here in Scotland, their bath is being carefully prepared for them by experts. When all is ready, the round up begins -- Hundreds of these docile creatures crowd together into the pens. It's some job getting them all in-- ~~In a big drive like this, sheep dogs prove more than their weight in gold. It's marvellous how they do it.~~

3

~~But presently, the pens are full. * Soon the stage is set and the bathing begins. *~~ It's a bit rough, don't you think, especially if the weather's chilly, but in ~~in~~ a heat wave, they'd probably like to stay under altogether. After such a ducking as this, think how

clean and nice our friends will be.

* From here, the sheep are guided through a narrow chute to the dipping bath.
