

Fashions look ahead to winter--

Sept Ist. '53.

Fashions always look ahead-- and Paris, like London, is ready to present the winter collection.

These come from Jacques Fath -- and ~~the~~ ^{FOR} ~~the~~ ~~costs~~ ~~that~~ ~~the~~ ~~party~~ ~~and~~

~~the~~ that cocktail party-- ~~the~~, a silk ensemble in different shades of grey. ~~the~~ ^{AND} ~~the~~, a creation in wool and brocaded

black silk.

Gowns for ~~LATER~~ ^{LATER} wear, too, one in pink and gold, and the other in white satin, with a black velvet ribbon.

Finally, a trio of beauty in the dresses of evenings to come --

Grey embroidered satin-- black velvet with a white ^{satin} belt,-- and an unusual leopard satin with a belt.

So do the fashion designers help to brighten the dark winter days that lie ahead.
