

Little Boko- the Surviving Twin

2083

This little girl holds a unique place in Britain's medical history. Yes, it's Boko - the four-months old survivor of the Siamese Twins - being admired by her West African mother...

Boko and her twin were flown from Nigeria to Britain for the delicate operation which was performed at a London Teaching Hospital...

After a two-hour operation, the girls were separated (they had been joined at the abdomen and chest), but unhappily only Boko survived. Throughout the country, mothers have anxiously watched the progress of this little ~~coloured~~ mite, as she slowly gained strength - a marvel of medical skill.

Her ward ~~is filled~~ is filled with the gifts of those who have admired her struggle for survival. And now, comes news that it may be possible for Boko and her mother to fly home.

So happy days, - little Boko - the best wishes of all of us go with you.
