Dry Dock launched

A dry dock is about to ^{go down the 18th Mar 54} ~~be launched~~ at Rendsburg, Germany. ^{56. p 1007} But despite this unusual type of launching, the dock was christened with the usual bottle of champagne.

The biggest and most modern of its kind ever built in the German Canal dockyard, it made ^{a rather} undignified descent to the water, sliding down sideways because of the narrow ~~width~~ of the waterway.

It will now be towed to Hamburg - for use in Germany's premier port.

New Tank

America: The wraps come off a new tank - the T.43 - with its 120 millimeter gun ~~(that is bigger than the largest ever mounted on a tank)~~

The T.43 is claimed to be as manoeuvrable as a jeep - and though it's obvious that it packs a mighty broadside - its speed is still on the secret list.

Tolworth - Aqualung demonstration

Tolworth: Demonstration of new diving gear ~~called~~ the "Aqualung". In theory compressed air is fed from a container on the back; but in practice - it helps if you're a real bathing belle...

One of the team went down to take some underwater pictures, and this was the result. Wearing the apparatus, which costs £44, you can stay under ~~water for half an hour~~

water for half-an-hour. Just long enough to get her telephone number. Soon, we'll be spending our holidays at Southend-under-Sea.

Disarmament Conference

London: Minister of State, Mr Selwyn Lloyd arrives at Lancaster House for the first meeting of the Sub-Committee of the United Nations Disarmament Commission. M. Jules Moch of France was among the delegates. ^{AL-50} The committee is seeking an "acceptable solution" to the problems of disarmament. ^{AL-50} WAS MR PEARSON FOR CANADA AND RUSSIA'S MR MALIN
