

Scotland: Sixty-two Sabre jet fighters arrive at the R.A.F. Station, Kinloss, the biggest jet formation ever to cross the Atlantic.

From the Control Tower ~~of the aerodrome~~, the "all clear to land" signal

~~is transmitted~~

is <sup>radioed</sup> ~~wirelessed~~ to the incoming planes.

The emergency landing drill goes into operation; with fire trucks and ambulances standing by...

And one by one - the Canadian-built Sabres (believed to be the fastest planes in Squadron service anywhere in the world) come in to land.

On the tarmac, Squadron-Leader Middlemass of the Royal Canadian Air Force who led the ~~mass~~ formation, is welcomed by Group-Captain R.B. Thompson, the Kinloss Station Commander.

After servicing and refuelling, the Sabres flew on to the Continent <sup>part of</sup>

<sup>2 massive</sup> two hundred million pound Canadian Contribution to the N.A.T.O. forces.

**MORE JET NEWS FROM**  
~~London~~ - Seattle - where the new Boeing jet airliner - America's challenge to the Comet - is all set for her first taxi-ing tests.

All seems well with the ninety-five ton giant - then ~~was~~ a sudden collapse - as the port landing-gear buckles. (3)

Fire trucks race to the scene as the pilot and crew scramble out of the damaged plane.

The jetliner (~~the first of its type~~) cost nearly six million pounds to build. Experts fear that its first test flight will be delayed many weeks.
