Niagara - Rocks collapse in the Falls

6th August 54

Niagara: Newsreel cameramen kept a round-the-clock vigil ^{FOR DAYS} at the famous falls - hoping to get some ~~exciting~~ ^{DRAMATIC SCENES} when cracks appeared in the rock formation at Prospect Point.

Workmen, too, were soon on the spot - trying to shore up the face of the falls - loosened by the constant, tumbling waters... IT PROVED A HERULET TASK. THE WAITING CAMERAMEN WERE SOON REWARDED. SENSATIONAL

PICTURES

~~as~~ as over 200,000 tons of rock, ^{earth,} ~~and~~ rubble ^{crash} into the 170 foot chasm - far below..

So the famous falls achieve a ^{slightly} new look, as the result of this, the largest breakaway for 28 years. ~~The largest breakaway for 33 years - is Nature's way of giving the Falls an attractive "new look".~~
