New Aircraft Carrier

In the Channel, this aerial view of Britain's latest aircraft-carrier, "H.M.S. Albion" clearly shows the new-style "angled flight-deck - which has been adopted by the U.S. Navy.

undergoing aircraft trials off Portland, Sea Hawks are catapulted from the "Albion" which is the first operational carrier to be fitted with the new "sight landing-aid"

This new device will enable the vessel to operate high-speed jet aircraft.

And here - a twin-jet De Havilland 110 demonstrates the advantages of the angled deck during landing operations - watched ^{by} the Company's chief test-pilot - Group-Captain Cunningham.

If the plane misses the arrester-wire - it can now fly straight on, over the ship's side - for another attempt.

New Transformer

Ontario: At Guelph, ~~where~~, a new electric transformer plant is ready to go into action - and performing the inauguration ceremony is the Provincial Premier.

All is set to throw the switch - and now, stand by for some opening fireworks.- Or should we say man-made lightning?

Yearling Sales

Dublin: The Yearling Sales at Ballsbridge reached a new record total of over 287 thousand guineas... Among the purchasers was Sir Gordon Richards set up as a trainer...

- who has retired from the saddle to ~~take up as a trainer~~

So we may yet see him leading in, ^{instead of} ~~not~~ riding in, the Derby winner.
