Suffolk: U.S. Air Force in Britain

14th Dec. 54

Suffolk: First Newsreel pictures of the American Thunderstreak Fighter-Bomber Wing at Bentwaters R.A.F. Station, ~~which~~ ^{AS} recently disclosed, ^{this} forms part of the N.A.T.O. Atom-Bomb Striking Force, now in Britain...

Capable of near-sonic speeds, the Thunderstreak has a range of over a thousand miles with a rocket-assisted take-off. ~~It is~~ ^{THESE AIRCRAFT ARE} capable of greater target destruction than all the bombers, based in Britain, in World War Two.

An atomic punch that would, if necessary, support the NATO ground forces. Meanwhile, at Wyton R.A.F. Station, Huntingdonshire, a ^{United States} ~~US~~ Mission ^{MEM AND} inspects planes (built in Britain under the Special Aircraft Assistance Plan) ~~at the~~

~~The Assistance Plan~~ provides another form of U.S. Aid that contributes towards the cost of aircraft to be used in Western Defence...
