Sucrolk: At Wattisham R.A.F. Station & reassuring line-up of Britain's increasing air-power - as the nawker "Hunter" goes into squadron service

There's a new generation at the helm; but the faster-than-sound Hunter, with its amazing rate of climb (the chief essentials in jet-age defence) is a worthy successor to that immortal mawker fighter, the

The Now He resion of the plane that set up a world-air speed record, two years ago, the service version of the plane that set up a world-air speed record, two years ago, the makers gave an impressive display of formation flying.

Already, the m.A.F. has three squadrons of the nunter, which has the most destructive fire-power of any fighter in the world to-day.

Top-speed production at this Dagenham factory, too, where they're coping

with heavy export orders for Britain's newest sub-machine gun, the "Sterling"

Adopted by the Army to replace the Sten gun - the new weapon can be fired from the shoulder of the hip - and in an emergency, with pistol-fashion. Sound

Six pounds and is accurate up to two hundred yards literature.

already proved in action, the Sterling's simple mechanism is tested by a twelve year-old Sea
