Atomic Energy School

Berkshire: For the first time since the Atomic Energy Research Establishment began its courses for industry, overseas students are attending the Harwell Reactor School.

The courses are designed to give information to industry on the ~~construction~~ construction of nuclear power stations - and the students learn to handle specialised equipment.

Another fact-finding visitor, (~~though~~ though one of a different sort) was Sir Anthony Eden. Fully recovered from his illness, the Premier was continuing his investigation of service and government establishments.

Fleming Memorial

Spain: The little seaport of Gijon honours the memory of Sir Alexander Fleming. In the presence of Lady Fleming, a bronze bust was unveiled in the public park. Subscribed chiefly by working people, the monument is their tributes to the man ~~who discovered penicillin for the benefit of~~ *whose discovery of penicillin has been of untold benefit* to mankind.

Fire-fighting demonstration

Folkestone: Fire-fighting efficiency reaches new heights, with the use of ~~the~~ <sup>type</sup> latest ~~type~~ <sup>type</sup> escalator ladder ~~and~~ mobile observation platform.

As the fireman goes aloft - the rising platform carries the director of operations to a suitable vantage-point.

In this way, the <sup>brigades</sup> full resources ~~of the~~ can be controlled by the Fire Chief from his platform - forty feet above the ground.

Big Explosion

Australia: Preparing for a big bang at Bombo Railway Quarry ~~in~~ in New South Wales, engineers lay their charges ~~in~~ in a cliff - ~~at~~ 115 feet high...

Ten tons of dynamite and gelignite are used - and, wait for it...SOUND The blast brings down about 250 tons of blue metal - a vital material for railway construction work.
