Roving Camera-

Floods-

Austria-- Following one of the worst winters in living memory, ~~the~~ flood waters ravage low-lying towns and cities in Central Europe. A state of emergency is declared after the River Danube had risen over 13 feet in two days.

Hundreds had to be evacuated ~~rather~~ as the waters rose, and in many cases, it was impossible to supply them with food and drinking water.

There are Similar conditions ~~exist~~ in the Rhine valleys- and it is feared, ^{that} with the general thaw, the worst is yet to come.

Rocket-

America-- On Long Island, "Nike"- the deadly guided missile, has taken over the defence of New York and the vital dock areas from anti-aircraft batteries. Soon every major city will be guarded by these supersonic missiles, which can destroy an enemy raider-in ~~xxxx~~ seconds.

Hospital Escape-

The normal quiet of a Charleston Hospital was rudely disturbed when a patient - suffering from a brainstorm- escaped from a ward and began climbing the high building.

Perched precariously on a ledge, he smashed windows and threatened members of the fire brigade (who were risking their lives to save him) with a jagged piece of glass.

The patient- Nester Moss Junior, then ~~leapt~~ leapt from the window-sill- but the story ends happily- he will receive further treatment.
