

"Exercise Sleeping Beauty"

Barrow: Safely "cocooned" for ~~over~~ two years, to ensure perfect ~~preservation~~ preservation, the destroyer, H.M.S. Dainty plays the leading role in Exercise "Sleeping Beauty"

But instead of a handsome Prince it's men of the Royal Navy who bring her back to life and fighting efficiency. An operation designed to test how quickly a "cocooned vessel" can be recommissioned for operational service.

In a well-co-ordinated exercise, supplies are carried aboard and H.M.S. Dainty is ready for ~~sea~~ <sup>sea</sup>

Rotorcycle

America: A new line in helicopters, a one-man model, goes into service with the U.S. Navy. Known as the "rotocycle", the midget weighs just over four hundredweights, and is propelled by a forty-horse-power engine. Highly manoeuvrable, the machine is intended for liason and observation work. The ~~ax~~ rotary blades are collapsible - so that it can be stored in a small space.

Athletes in U.S.

New York: By virtue of a court order, Wes Santee, the crack U.S. Miler, runs again, following his life suspension for violating the amateur runners code. Fearing reprisals, five ~~men~~ withdrew, and Santee won a three-man ~~XXXXXX~~ race.

The Santee drama overshadowed a great Pole Vault by Don Bragg of Villanova. Watch him clear fifteen feet, five-and-a-quarter inches... a world record for an indoor meeting.

Mayflower ~~XXXXXX~~

Devonshire: At Brixham, a sailing vessel which forged those early links between Britain and ~~the United States~~ <sup>America</sup> is being re-created... It's the Mayflower II - an exact replica of that brave <sup>little</sup> vessel ~~which~~ which carried the Pilgrim Fathers to New England, 335 years ago. When completed, this modern Mayflower will sail across the Atlantic as a good-will gift to the American people, and a reminder of our common

ancestry  
this.
